Get a complete picture of your operations anywhere, anytime, on any device

KEY BENEFITS

COORDINATE ACTIVITIES

- Manage your entire business with complete, real-time information for your operations
- Coordinate labor, machines, and inventory and optimize your company's processes
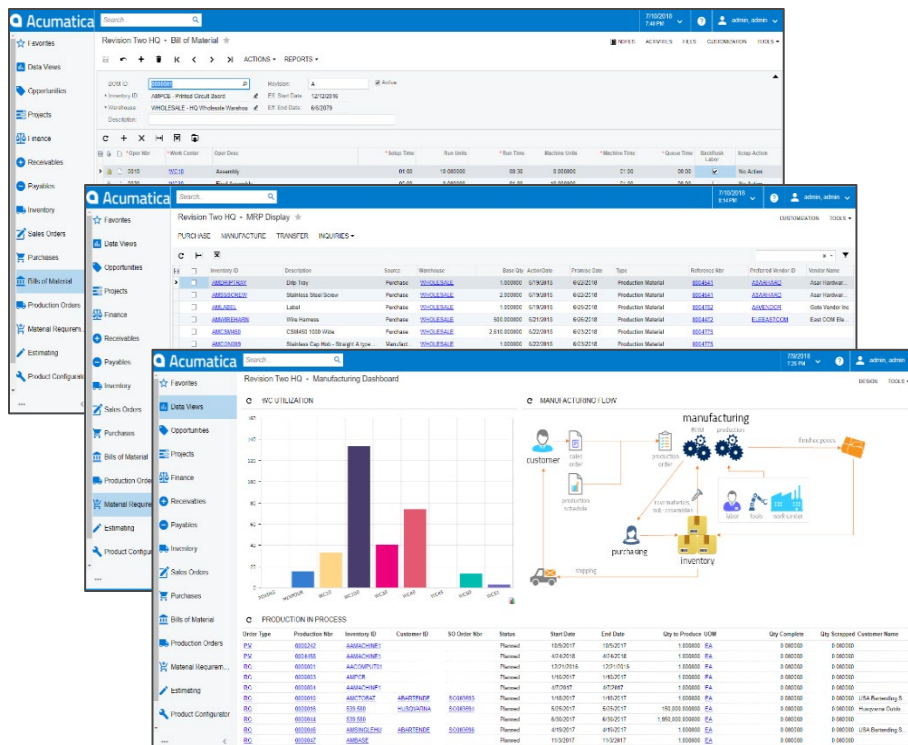

AVOID OUTGROWING YOUR SOFTWARE

- Adapt the software as your business grows
- Use phones and tablets to capture material issues, move transactions and labor with Acumatica's mobile app and scanning.

MEET SCHEDULES

- Respond to demand while optimizing inventory and resources
- Achieve effective cost control with MRP planning

TRACK YOUR COSTS

- Track material and labor costs as you manage your products
- Compare estimated, planned, and standard production costs to actual costs of production

MANUFACTURING EDITION FEATURES AND CAPABILITIES

Estimating	Create estimates for new or existing items and convert them into bills of materials, production orders, and/or other estimates.
Product Configurator	Use this multilevel, dimensional, rules-based system with nonhierarchical feature selections and configuration evaluation on quotes, sales orders, and/or production orders with real-time price and cost rollup.
Advanced Planning and Scheduling	Manage and monitor your shop floor schedule and work center capacity, both finite and infinite. Includes what-if planning capability, capable-to-promise, as well as the ability to schedule employee and/or machine resources.
Production Management	Manufacture to a project and track all associated costs at the project task level. Compare actual costs to a user-established budget. Production orders can be tied directly as a task to a project or produced to stock.
Engineering Change Control	Automate, control, and organize all change requests, plans, and actual changes to a bill of materials. Exercise full control from engineering change request to engineering change order to engineering change notice with approvals throughout each step in the process.
Order Management	Manage sales activities, streamline procurement processes, and automate order fulfillment for internal or external clients
Material Requirements Planning (MRP)	Meet customer demands by setting accurate and reliable delivery dates based on availability of resources.
Warehouse Management System (WMS)	Streamline distribution processes with advanced warehouse operations in receiving, inventory management and order fulfillment. Improve customer satisfaction and reduce costs with barcode scanners and mobile devices.
Advanced Financials	Augment Acumatica's base financials with advanced financial capabilities, including GL consolidation, sub-accounts, and automatic revenue recognition.
